

## The Metropolitan Transportation Commission plans to convert the existing High Occupancy Vehicle (HOV) lanes between Oakland and Milpitas to express lanes.

### THE PROJECT INTENDS TO:

- Maximize the capacity of the HOV lanes;
- Provide reliable travel times for customers;
- Better manage lanes to keep traffic moving; and
- Allow solo drivers access to the HOV lane by paying a toll.

### WHAT'S INVOLVED

The conversion would involve striping lanes; upgrading CHP observation areas; and installing signs, sign gantries, FasTrak® toll tag readers, and traffic monitoring equipment.

### OPEN HOUSES

MTC invites you to attend an informational meeting to learn about the project and talk with project team members.
